Research Interests

My research interest lies in the field of medical robotics, especially in surgical robots and image-guided robot systems for minimally invasive interventions. Topics of particular interest are:

- (1) Dexterous wrist mechanisms for micro-laparoscopic tools
- (2) Robotic catheters for minimal invasive interventions: Design and control of steerable catheters based on mechanical model.
- (3) Intraoperative image-guided robots: Ultrasound and fluorescence image guidance during surgery
- (4) Magnetic Resonance (MR) image-guided robots: Development of mechanisms and sensors that are compatible with the high magnetic field environment of the MR scanner.
